ANNUAL COMMENCEMENT

EVANSTON, ILLINOIS

## UNIVERSITY SEAL AND MOTTO

Soon after Northwestern University was founded, its Board of Trustees adopted an official corporate seal. This seal, approved on June 26, 1856, consisted of an open book surrounded by rays of light and circled by the words *Northwestern University, Evanston, Illinois*.

Thirty years later Daniel Bonbright, professor of Latin and a member of Northwestern's original faculty, redesigned

the seal, retaining the book and light rays and adding two quotations. On the pages of the open book he placed a Greek quotation from the Gospel of John, chapter 1, verse 14, translating to *The Word . . . full of grace and truth*. Circling the book are the first three words, in Latin, of the University motto: *Quaecumque sunt vera* (Whatsoever things are true). The outer border of the seal carries the name of the University

and the date of its founding. This seal, which remains Northwestern's official signature, was approved by the Board of Trustees on December 5, 1890.

The full text of the University motto, adopted on June 17, 1890, is from the Epistle of Paul the Apostle to the Philippians, chapter 4, verse 8 (King James Version).

# HISTORY OF NORTHWESTERN

The founding of Northwestern University by nine devout Methodists embodied a mixture of religious conviction and secular optimism that is uniquely American. Meeting above a hardware store in the burgeoning frontier town of Chicago, these nine men resolved on May 31, 1850, to establish an institution of “the highest order of excellence” to serve the people of the original Northwest Territory as established by the Northwest Ordinance of 1787 (Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota). The 1851 Act of Incorporation creating Northwestern University contained a provision reflecting the strong religious beliefs of its founders but requiring no particular religious faith of students or members of the faculty.

Only one of the founders, physician John Evans, was a college graduate. The quintessential renaissance man, he built railroads, founded both the Illinois Medical Society and the Illinois Republican Party, and was a confidant of Abraham Lincoln, who appointed him governor of the Colorado Territory. Evans guided Northwestern during its critical early years, chairing the Board of Trustees from the time of the University’s founding in 1851 until his death in 1897. The town that grew up around Northwestern was named Evanston in his honor.

Northwestern grew and prospered under Evans’s stewardship. In 1853 the University bought and began to develop 379 acres of lakeshore farmland. By 1855 the University had completed its first building and opened a College of Liberal Arts with two faculty members and ten male students. By 1869 Northwestern had admitted its first female students; four years later, it negotiated a merger with the Evanston College for Ladies, whose president, eminent suffragette and temperance movement leader Frances E. Willard, became Northwestern’s first dean of women.

By 1900 Northwestern consisted of not only a liberal arts college but also six undergraduate and graduate professional schools, including the schools of law and medicine in Chicago. With the establishment of the Graduate School in 1910, Northwestern adopted the German university model of providing graduate as well as undergraduate instruction, emphasizing research along with teaching.

The University’s development since then has paralleled the growth of metropolitan Chicago. Today Northwestern is a private research university of distinction, with 11 academic divisions located on two lakefront campuses in Evanston and Chicago; in 2008 a branch campus opened in Doha, Qatar. The University has approximately 3,100 full-time faculty, 16,000 full-time students, and an annual budget of more than \$1.6 billion. Northwestern’s vision of excellence—although faithful to its founding—invigorates a territory far beyond the old Northwest Territory through the accomplishments of its alumni and by virtue of a distinguished faculty and high-achieving student body drawn from across the nation and around the world.

## DISTINGUISHED SECONDARY TEACHER AWARDS

**Rafael Arechabaleta** is an honors and Advanced Placement physics teacher at University School of Nova Southeastern University in Fort Lauderdale, Florida. Born in Cuba, Arechabaleta received BS and MS degrees from the Ukraine's Kharkov State University and an MS from Florida International University. He was nominated by Weinberg College of Arts and Sciences seniors Matthew Adam Bartnovsky, Michael Dornbusch, Mitchell Drew, Kelly Flowers, and Jonathan Schwartz. "Education provides students the latitude to form their own opinions and to challenge themselves and society around them," says Arechabaleta. "Having been educated in communist Cuba, where free thought was discouraged and educational resources were limited, I truly appreciate educational freedom and strive to provide my students the opportunity to design their own curriculum." He is the second teacher from University School of Nova Southeastern University to be awarded Northwestern's Distinguished Secondary Teacher Award.

**John F. Belcaster** teaches honors US history and honors world studies as a member of the social science faculty at Walter Payton College Preparatory High School in Chicago. A Northwestern University alumnus, Belcaster earned his MA and JD from Yale University. Prior to teaching, he worked with future president Barack Obama at the Chicago law firm Miner, Barnhill & Galland. Belcaster went on to teach AP economics and history at Chicago's Northside College Preparatory High School, where one of his students was Patricia Radkowski, now a Weinberg College of Arts and Sciences senior. In nominating Belcaster for the award, Radkowski describes him as "passionate about his position and his students and incredibly educated." Walter Payton College Prep principal Tim Devine praises Belcaster as "unparalleled at creating a student-centered environment."

**Amanda Bright** teaches journalism and composition at Mattoon High School in Mattoon, Illinois, where she developed the school's journalism curriculum and serves as adviser to its award-winning student newspaper. A graduate of the University of Illinois at Urbana-Champaign, Bright earned her master's degree at Eastern Illinois University. Describing her teaching philosophy, Bright notes, "The moment I become static and unresponsive to the changes in my students and our culture, I will lose all effectiveness." Medill senior Sarah Eberspacher credits her former teacher with inspiring her to pursue journalism in college at a time when virtually no other Mattoon High School students were following that path. "Just four years later," says Eberspacher, "three or four Mattoon students are heading off each year with plans to become the next Al Neuharth, Bob Costas, or Anna Quindlen. The woman behind that is Mrs. Bright."

**Greg Devine** teaches introductory and Advanced Placement physics at Delbarton School in Morristown, New Jersey, where he joined the faculty in 1998. He also directs the school's wind and brass ensembles and advises its Engineering and Design Club. A graduate of Williams College, where he double majored in physics and music, Devine also earned an EdM from Harvard University's Graduate School of Education. He was nominated by McCormick School of Engineering and Applied Science senior Luke Francis Hemenetz. "Greg Devine sparks a passion for learning in his students, and his students respond in kind," says Delbarton School headmaster Brother Paul Diveny. "With a true passion for teaching and self-renewal, Greg is a lifelong learner himself, and this is what he models to his students."

**Christine Jawork** teaches African and Asian studies and psychology as a member of the social studies faculty at Harriton High School in Rosemont, Pennsylvania. She also directs the school's Students Building Community Team, advises the World Affairs Club, and coaches the award-winning Mock Trial Team. A graduate of Pennsylvania State University, Jawork describes her primary teaching goal as "to help students rediscover their own passion for knowledge, which, by high school, has often long been in latency." She was nominated by Weinberg College of Arts and Sciences senior Benjamin Goldberg, who says that his former teacher "forced her students to confront unchallenged assumptions and to think critically about history and the study of culture. She taught with an incredible energy and charisma, bringing her whole self into the classroom and inspiring us to learn. I looked forward to her class every day."

# ACADEMIC PROCESSION AND DRESS

---

## ACADEMIC PROCESSION

The procession begins with the participating schools of the University. Each school group is preceded by its banner. The formation within each school begins with those graduates receiving the highest degree awarded by that school; doctoral candidates are followed by master's candidates, who in turn are followed by bachelor's candidates. Following the graduates are the University faculty, trustees, administrators, and deans. The president's party, led by the senior class Commencement committee, completes the procession.

## ACADEMIC DRESS

Modern academic attire originated in the medieval universities of Europe, where gowns were worn daily to provide warmth in poorly heated buildings and to differentiate scholars from other citizens. Two English universities, Oxford and Cambridge, are particularly noted for developing the authentic academic costume, which has changed only slightly through the centuries.

In the United States most academic dress follows the general provisions of the Intercollegiate Code of 1895, which was revised in 1932 and again in 1959. Under this code the gowns' trim and sleeve design indicates the level of the degree. The bachelor's gown has pointed sleeves and is worn closed; the master's gown has oblong sleeves with an arc at the bottom and may be worn open or closed; and the doctor's gown, which may also be worn open or closed, has velvet facings down the front and three velvet bars on the bell-shaped sleeves. This velvet trim

may be black or the prescribed color of the academic area. Though the recommended color for gowns is black, Northwestern University (like many institutions) has adopted a colored gown to reflect the school's color. All participating candidates wear a custom purple gown featuring the University crest. Graduates of foreign universities wear gowns of various colors.

The style of hood identifies the level of the degree, the school that granted it, and the academic area. Hood length and border width show the level of the degree. The bachelor's hood, which is optional and not worn at Northwestern University, is three feet in length; the master's, three and one-half feet; the doctor's, four feet. The velvet border of the hood is two, three, and five inches wide for the bachelor's, master's, and doctor's degrees, respectively. The hood is lined with silk in the official color of the school. At Northwestern the hood is lined in purple (the school's color) and gold. The color of the hood's border—and at Northwestern the color of the cap's tassel as well—indicates the academic area. Tassels feature the Northwestern seal signet and are worn on the left side at all times. At Northwestern the colors for the Graduate School constitute an exception; tassels are black, but the border color of the hood indicates the specific degree awarded. Bachelor's degree regalia include a souvenir stole.

The square black mortarboard is the recommended cap, although some schools have adopted other styles. Caps are worn throughout the Commencement ceremony, except that men remove them for the national anthem, invocation, and benediction.

At Northwestern University members of honor societies may be recognized by the honor cords, medallions, and stoles worn.

The tassels and borders of the hoods are the following colors:
